

Getting started with Notion

Notion is an all-in-one productivity tool that helps individuals and teams manage notes, projects, databases, and collaboration in one place.

Notion enables users to build efficient systems that are customized for tasks and knowledge management.

Key Features

Notion includes many powerful features.

Blocks

Everything in Notion is built using blocks.

like:

- Text.
- Images.
- Checklists.
- Videos.

Note:

You can edit, move, and arrange any "block."

Databases

A database helps you store and organize information in a structured way, like

- Tables.
- Kanban boards.
- Calendars.
- Lists.

Collaboration

Teams can create shared workspaces and project trackers.

Notion AI

Built-in AI can help you to:

- Summarize notes.
- Translate text.
- Find information across workspaces.

Notion agents

Notion Agent is a AI powered, autonomous teammate built into Notion to:

- Handle complexity.
- Building databases.
- Updating content.
- Editing pages.
- Analyzing information.

Note:

Keep telling your agent what to change or add, and be specific to get better results.

Templates

There's a wide library of free and paid templates that you can use for starting.

Cross-platform

Notion is available on desktop, mobile app, and web browser.

What is Notion used for?

Users often use Notion to:

- Project management.
- Tracking tasks.
- Creating roadmaps.
- Managing workflow.
- Knowledge management.
- Meeting notes.
- Writing documents.
- Budgeting.
- Travel planning.
- Habit tracking.

Notion navigation

There's the basic navigation in Notion:

Sidebar

You can organize, arrange, and find your badges within the sidebar, because the sidebar makes it easy to structure your content in your workspace.

Search

Use the search button in the top left for quick navigation to any page.

Editor

The editor in Notion is a flexible, block-based system for creating, rearranging, and styling content.

Users often use the editor to:

- Creating notes.
- Using markdown shortcuts.
- Tracking projects.
- Collaboration.
- Organizing information.

Page menu

The page menu allows you to access page settings such as sharing, locking the page, and viewing page history.

Using examples:

- Creating a custom sidebar navigation.
- Top navbar.
- Table of contents.
- Icon menu.

Getting started with Notion

You can start with free or paid templates to make getting started easier, or you can

- Create a new page.
- Add blocks like texts, images, videos,
- Create a subpage.
- Create a database.
- Organize your workspace.
- Collaborate with people.

Notion is a central tool specifically designed to manage and track your projects in an easy, organized way.
